The following is a blanket review for all the Aldorlea games I have played. This is valid, I think, because the problems are exactly same.

I gave these games a genuine try, but everything by Aldorlea has the same set of problems. Horrible level design, the most god awfully boring and unsatisfying stories, TONS of HUD problems, and a single goddamn music track for each game. The only redeeming qualities these games have is the art (one of the games has some humor as well); but unless you have a damn fetish single poses for each character, you're gonna be disappointed. Like if the story was good, the other\u2665\u2665\u2665\u2665\u2665\u2665 would be tolerable. That's why we stuck through this\u2665\u2665\u2665\u2665\u2665\u2665 with classic titles like Golden Sun. I'm sorry, but an rpg with \u201cmeh\u201d level combat and drool inducing story is not worth it by a long shot.

tldr: This game is not worth playing. None of the other games (that I've played, which is the first title of almost every series) made by Aldorlea are worth playing either.. I want my 300+ hours back. Got this and was actually surprised how much fun it is. Though it is what you would expect out of a \$.99 game, after about 2 hours you have done all the achievements and the game is done, or is it?. not suggested.... Great!

Build / Research / Produce / Sell

Takes a little getting used to but I like it!

Right now I have to finish other games, (Steam and it's sales... you know ;)) but this one is certainly one I'll come back to have fun playing

Thumbs up!

:)

. This game is awesome if you love snowmobiles ... which i do!!

Fabulous sound, great racing feeling with lots of stunts to do ... which I love! It's a solid game for the price.

All in all I think it might be the best snowmobile racing game ever! \u2665\u2665\u2665\u2665\u2665

Simple, but a nice little game.. >Plays Hakumen
"Ha, ya like damage?"

Play CF. I'm straight up mad at Bethesda here. I bought the game a week ago for a full \$60USD, which I was on the fence about because I had already bought it once on PS4, then a normal PC copy here on Steam. But I decided to pull the trigger anyways, and here we are not even a full week later and they put the game on sale! Now it's going for \$39, which really should've been the normal price. It's total crap how this happens just after I bought the game. I wouldn't be complaining if I had the game for a while, but only a week and the price goes down, absurd.. I played the game since beta and have loved it since. It takes the extremely fun elements of PVP, such as arena in WOW, and combines into a whole new outlook of 3rd person shooter with advanced combat. I would recommend the game to anyone as the play style is easy and viarable enough to hold heavy interest. I look forward to ranking up class and recording of stats. For what its worth, I think its an amazing game with huge potential as the pvp competition becomes organized.
Cheers.

bageti.com. This is quite "small" game that bases it's mechanic on avoiding obstacles during slow fall.

The atmosphere and mood is jaw-dropping. If you are equipped with a VR device get ready for a very disturbing and incredible experience.

. Very fun game to play with the VR mechanics
